

What could you achieve with a Building Management System?

Monitor and control your buildings' mechanical and electrical equipment, including heating, ventilation, air conditioning (HVAC) and lighting. Get ultimate efficiency and optimal building operations.

Transform your estate with a Building Management System.

In our experience, around 95% of data in buildings is unused - despite its massive potential. A Building Management System (BMS) unleashes the power of the data that already exists at your fingertips. You'll see multiple benefits for your high-performing places: energy savings, reduced carbon emissions, greater operational efficiency and enhanced colleague productivity.

40%
of global CO₂ emissions
come from buildings

Core capabilities

Mitie's Intelligent Buildings service is one of the UK's leading providers of BMS products and support.

With extensive knowledge of a variety of original equipment manufacturers' building solutions, we provide an impartial BMS approach focused on the best match for your requirements. You will...

Reduce energy consumption

Implementing a BMS typically contributes to a reduction in energy consumption of between 15 and 30%.

Maintain optimal air temperature and quality, as well as humidity and lighting

This increases building user satisfaction and productivity.

Identify and resolve potential issues before they escalate

Avoiding major breakdowns and downtime reduces maintenance costs.

Make informed decisions

Run your estate based on what the data is telling you, turning insights into action; no guesswork involved.

BMS delivery framework

Mitie's BMS solutions are delivered nationwide by our in-house specialists. Our experience and approach are rooted in providing BMS services to customers across the public and private sectors, including in highly secure environments.

Consult

Surveys, specifications, design, condition assessment, lifecycle planning and BMS strategies tailored to your estate.

Projects

Installation, upgrades, lifecycle replacement, software and energy optimisation.

Maintain

Remedial work, planned and reactive maintenance, energy adjustments.

Monitor

Remote monitoring and maintenance of your BMS.

Ready to see what you can achieve with the support of our Intelligent Buildings team?
